Showcase description

In 2009 I graduated at "Liceo Francesco Petrarca" (linguistic highschool of Trieste, Italy), now I'm studying architecture at the University of Trieste. I have good knowledge of digital painting, 3D modelling, photomontage, photo-retouch, using programs as Photoshop, Autocad and 3d Studio max. My greatest interests are music (rock, jazz, classic), literature, theatre, but the thing I love obviously the most is drawing (both on paper and digital with a graphic tablet). My newest digital paintings are visible on my facebook profile.
