Showcase description

Lo studio di architettura Gianluca Calderini opera nel campo della gestione del progetto di architettura (dal semplice organismo edilizio alla scala urbana) e della pianificazione urbanistica ed ambientale, privilegiando un'idea di città come "città da abitare". La particolare attenzione dedicata al tema della residenza e della produzione (progetto ex novo, recupero, trasformazione) si estende alla progettazione a scala urbana (piani attuativi arredo urbano) e fonda il proprio operare sull'approfondita interpretazione delle esigenze del committente e sull'attenta valutazione dei singoli contesti di intervento. Lo studio si occupa anche di progettazione di interni, negozi e allestimenti.
