Showcase description

From paper to the web, I can assist my customer at 360° I defined myself as an Evolved Graphic Designer because to me designing has always meant listening, understanding the needs of my customers and adapting to the field or industry of reference. My work has changed over time, and has evolved into worlds that go well beyond traditional graphic design, moving towards the Digital and New Media. I have simply embraced this trend, and offered my experience together with the new opportunities yielded by the world of the web, in order to propose communication at 360°. For more than 30 years, I have been assisting my customers in the design and execution of projects related to the world of communication. Furthermore, I am a strong supporter of warehouse co-working, that is, I rely on the collaboration of other professionals in the industry in order to offer a complete service: coordinated corporate image design, catalogue design, logos, trade fair fittings, packaging, web layouts, as well as set-up and management of social media.
